Post Body

Each field in the request for a PDF is based on the response data from submitting the quote request.

Parameter	Type	Required	Description
id	decimal	Y	The <code>id</code> field from the quote response data
gen_date	decimal	Y	The <code>timestamp</code> field from the quote response data
quote_num	decimal	Y	The <code>quote</code> field from the quote response data

Example: Quote PDF

JSON

Valid Request Body

```
1 {  
2   "id": "1652859999",  
3   "gen_date": "20201004199626172754",  
4   "quote_num": "299999999"  
5 }
```

Success Response

The response will contain a binary PDF file of the quote that you can save to the disk with a

`"Content-Type: application/pdf"`.

JAVA

```
1 OkHttpClient client = new OkHttpClient().newBuilder()  
2   .build();  
3 MediaType mediaType = MediaType.parse("application/json");  
4 RequestBody body = RequestBody.create(mediaType, ""  
5 {  
6   "id": "1652859999",
```

```

7  "gen_date": "20201004199626172754",
8  "quote_num": "299999999"
9  }""");
10 Request request = new Request.Builder()
11     .url("https://www.mtdirect.ca/api/online_quoting/quote_pdf")
12     .method("POST", body)
13     .addHeader("Authorization", "Token ") //Add Token
14     .addHeader("Content-Type", "application/json")
15     .build();
16 Response response = client.newCall(request).execute();

```

C#

```

1 var client = new RestClient("https://www.mtdirect.ca/api/online_quoting/quote_pdf");
2 client.Timeout = -1;
3 var request = new RestRequest(Method.POST);
4 request.AddHeader("Authorization", "Token "); //Add Token
5 request.AddHeader("Content-Type", "application/json");
6 var body = @"{
7     ""id"": ""1652859999"",
8     ""gen_date"": ""20201004199626172754"",
9     ""quote_num"": ""299999999""
10 }";
11 request.AddParameter("application/json", body, ParameterType.RequestBody);
12 IRestResponse response = client.Execute(request);
13 Console.WriteLine(response.Content);

```

PYTHON

```

1 import http.client
2 import json
3
4 conn = http.client.HTTPSConnection("www.mtdirect.ca")
5 payload = json.dumps({
6     "id": "1652859999",
7     "gen_date": "20201004199626172754",
8     "quote_num": "299999999"
9 })
10 headers = {
11     'Authorization': 'Token ', //Add Token
12     'Content-Type': 'application/json'
13 }
14 conn.request("POST", "/api/online_quoting/quote_pdf", payload, headers)
15 res = conn.getresponse()
16 data = res.read()
17 print(data.decode("utf-8"))

```

JQUERY

```

1 var settings = {
2     "url": "https://www.mtdirect.ca/api/online_quoting/quote_pdf",

```

```
3  "method": "POST",
4  "timeout": 0,
5  "headers": {
6    "Authorization": "Token ", //Add Token
7    "Content-Type": "application/json"
8  },
9  "data": JSON.stringify({
10    "id": "1652859999",
11    "gen_date": "20201004199626172754",
12    "quote_num": "299999999"
13  }),
14 };
15
16 $.ajax(settings).done(function (response) {
17   console.log(response);
18 });
```
