

Accessing any of the API methods requires you to first authenticate yourself and then to be authorized to perform the requested action.

1.Authentication/Authorization by API Access key/token

1.1.Request access Token

API access for building integration are required to request API key access through their MTDirect account. Login requests are made by making a `POST` request to the following URL:

```
POST /api/users/auth
```

1.2.POST data

Params	Descriptions
username	Your mtdirect username or email address
token	Your API token
company	Your mtdirect company (usually "MANITOULIN")

A successful login will return a token for future request. Token is valid for 1 hour.

1.3.Example

Valid POST data:

```
1 {  
2   "username": "tester",  
3   "token": "09348502435asbdfouo34u2523445563523423445aferegd",  
4   "company": "MANITOULIN"  
5 }
```

Example of a valid token:

```
1 {  
2   "status": 0,  
3   "detail": "Success",  
4   "token": "eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzI1NiJ9.eyJhbnV9FwFBJulki0jE1ODE3MDM0MjUuNzk3NTY4LCJhbnV9VSUQiOjE1NiJ9",  
5   "expiry": "2024-05-02 13:03:45"  
6 }
```

1.4.Token Usage

Example of valid header:

Authentication/Authorization by username/password will be deprecated and no longer supported by August 9th 2024. Please use API Token
