API Introduction and Important Information

We are pleased to offer our clients API Quoting and Order Entry services for palletized or crated, intra-Canada and cross-border shipments between Canada and the USA, leveraging CSA Transportation's extensive network and expertise. The API for USA-to-USA shipments is not currently available. **Please do not submit hazardous, temperature-controlled, or intra-USA shipments/quotes.**

API auto-rating will work for standard skids and most skids that are over-dimensional in length for over 44,000 lane combinations, covering more than 1.2 million postal codes and zips throughout Canada and the United States. It is recommended to always input the larger of the length and width in the length field to increase your chances of auto-rating.

If the API call does not return a value in the 'charges' field, this means the shipment did not auto-rate, and you will need to request a rate through your online portal or our Customer Care Team.

Canceling shipments is not available through the API. Order cancellations or revisions **MUST** be handled through our Customer Care Team via phone or email.

API Additional Services Available

Not all additional services are available through API since some require more detailed information. The **only** additional services that are available by API are:

- Appointment Pickup and Delivery (booked by CSA not pre-scheduled)
- Call Ahead Pickup and Delivery
- Tailgate Pickup and Delivery
- Residential Pickup and Delivery (Must be accompanied by Tailgate and Appt)
- Limited Access Pickup and Delivery

Unique Consignees

There are some specific delivery consignees, that can be challenging to deliver to and therefore many of our beyond and advance partners may not deliver to those locations or may require a surcharge for these deliveries. For these consignees, please request a spot quote via email for an accurate rate.

Canada Locations:

- Costco (some Costco locations require only their shipment on the trailer on delivery)

USA Locations:

Freeman	Chewy	DPI	CVS	Chex	Amazon
Ikea	Trader Joes	United Supermarket	Vons	Wayfair	GES
Costco	Kroger	Peytons	Sysco	Davidson	Aafes
Safeway	Albertsons	King Soopers	Hyvee	AWG	Tom Thumb
UNFI	Shaws	Fred Meyers	Publix	Jewel Osco	Randalls
KeHE	Wells	H.E. Butt Company	Walgreens	GFS	Military Bases

Key Points for Developers

Thank you for reviewing the entire document. We are happy to clarify any questions you may have. This section outlines some of the key concepts to note to make it easier for developers.

Shipment Types not Supported through API (We should be excluded from)

- USA to USA shipments
- Temperature Controlled Shipments
- Hazardous Goods Shipments
- Loose boxes, rolls, pieces that are not crated or palletized for handling by a pallet jack or forklift
- Shipments requiring additional services beyond the additional services identified on page 1 of this document
- Shipments with more than 10 handling units

Currency Applications

Most Common Application

To avoid an unnecessary impacts of currency exchange and since the majority of TMS's show Canada to Canada lanes in CDN funds and Cross Border lanes in US funds, this is the API format we utilize. To accomplish this format, it is necessary to setup accounts and login credentials for each currency, **one in CDN funds and one in US funds.**

Our software was developed in Canada and by nature the API defaults to Canadian currency. So, for the US accounts there are some modifications to the coding required:

- Must have a US Currency account setup
- All API calls for quotes or orders in US funds must include the US Currency code noted in example calls on pages 7 and 12
- All API calls for additional services in US funds must utilize the US Funds "aChargeCode": identified on pages 4 and 5

If you are a US company and require both Canada to Canada and Cross Border to rate in US funds, please contact your Account Manager and they request approval.

The defaults identified are important, please pay close attention to:

"pieces": 1,

This means, the dimensions, and weight of each skid or crate (handling unit) must be sent separately. Attempts to combine numerous handling units by increasing the "pieces" will not return a rate. Example calls show this format for two handling units. This format would be copied for additional handling units up to a maximum of 10.

"piecesUnits":	"SKD", (palletized or crated, will rate with API)
"piecesUnits":	"PCS", (loose, not palletized or crated will not rate with the API)

Loose rolls, boxes, pieces that are not palletized or crated are not supported by API. "SKD" represents palletized or crated handling units. This is why it is the default value required to return a rate.

Address Line 1

As you will see on page 5 we utilize address line 1 for shipper/consignee specific notes like "closed for lunch" or "go around to the back", or "always require pickup #". Address Line 2 is used for the shipper or consignee street address.

Variables

baseUrl: <https://tmap-test.csatransportation.com/tm>

This is a testing baseUrl, when you go live we will provide the live baseUrl to you to substitute.

bearerToken:

Generate Token

This creates bearer token to be used above

{{<https://tmap-test.csatransportation.com/tm>}}/login

Body

```
{
  "password": "ENTER THE ONE PROVIDED TO YOU",
  "username": "ENTER THE ONE PROVIDED TO YOU"
}
```

This username and password provided to you by your rep are for the testing environment. Your company will be assigned a unique username and password for your account, once testing is complete.

Fields that MUST be Defaulted to defined values

"commodity":	"COM",
"lengthUnits":	"IN",
"widthUnits":	"IN",
"heightUnits":	"IN",
"weightUnits":	"LB",
"pieces":	1,
"piecesUnits":	"SKD", OR "PCS", if not crated or skidded
"requestedEquipment":	"LTL",
"serviceLevel":	"CONSOLIDAT",
"siteId":	"SITE1",

These values must be defaulted in all cases to obtain a rate. Each handling unit is rated individually, so the weight and dimensions of each handling unit must be provided separately. For example, specifying '2 pieces' without singular weights and dimensions will not return a rate.

Shipments with "piecesUnits": "PCS", will not auto rate within the API. Only crated or skidded shipments identified as "SKD", will rate. The "PCS" is used to identify loose shipments that should not rate, to avoid service issues.

FOR US CURRENCY ACCOUNTS ONLY

US Currency accounts must be setup with CSA Accounting. If your account is setup for US billing, you must add the below code to your Quote or Order call for the values to return in USD.

Important Note for US billing accounts: Add "currencyCode": "USD" at the end of each quote or order call

**** IF THESE DEFAULTS ARE NOT FOLLOWED, QUOTES CANNOT BE HONORED****

Fields that are variable depending on Quote/Order

Green shows fields that MUST be provided for Quotes. Green and Red show what MUST be provided for Orders. It is very important that these fields are properly populated as required.

<u>FIELD NAME</u>	<u>DEFINITION OF FIELD</u>
"Description": "BEARINGS",	COMMODITY BEING SHIPPED
"height": 48,	HEIGHT OF THE SKID OR CRATE
"length": 48,	LENGTH OF THE SKID OR CRATE
"width": 48,	WIDTH OF THE SKID OR CRATE
"weight": 1000,	WEIGHT OF THE SKID OR CRATE
"user1": "UPSSCS"	CUSTOM BROKER NAME (required for cross border only)
"traceNumbers": [	
"traceType": "P",	CLIENT REFERENCE NUMBERS "P" IS PO #, "R" IS PICKUP # and "J" IS LOAD #
"traceNumber": "151111"	THE REFERENCE NUMBER
"aChargeCode": "TAIL-C"	

"TAIL-C"		TAILGATE PICKUP (Code Canadian Funds)
"TAILC-C"		TAILGATE DELIVERY (Code Canadian Funds)
"CURBP"		RESIDENTIAL PICKUP (Code Canadian Funds)
"CURB"		RESIDENTIAL DELIVERY (Code Canadian Funds)
"APPTFEEP"		APPT PICKUP (Code Canadian Funds)

"deliverByEnd": "2023-11-15T17:00:00",		QUOTE SAME DATE AS PICKUP THIS WILL POPULATE IN RESPONSE BASED ON TRANSIT TIME

ORDER: SAME DAY AS PICKUP AND CLOSE TIME OF RECEIVER

Once the shipment is transmitted, it cannot be edited or cancelled via API. Any changes must be made via phone or e-mail.

Response Packet Elements to Understand

Pay close attention to "charges" field on response. If this is zero, the quote or order did not auto-rate.

<u>FIELD NAME</u>	<u>DEFINITION</u>
"billNumber": "WQ1926252",	→ THIS WILL BE YOUR QUOTE OR TRACKING NUMBER
"charges": 402,	→ THIS MUST HAVE A VALUE MORE THAN "0" OR THE SHIPMENT DID NOT RATE. THIS IS THE RATE BEFORE ANY ADDITIONAL SERVICES OR TAXES.
"userFieldInt2": 5	→ ESTIMATED TRANSIT TIME IN BUSINESS DAYS
"aCharges": [	
"aChargeCode": "TAIL-C",	→ CODE FOR ADDITIONAL SERVICE
"chargeAmount": 65,	→ CHARGE FOR ADDITIONAL SERVICE
"description": "Tailgate	→ DESCRIPTION OF ADDITIONAL SERVICE
"orderId": 4193692,	→ ORDER ID REQUIRED FOR STATUS CALLS
"tax1": 0,	→ APPLICABLE TAXES
"tax2": 0,	→ APPLICABLE TAXES
"totalCharges": 487,	→ TOTAL CHARGES INCLUDING FREIGHT TAXES AND ADDITIONAL SERVICE

Quotes to Orders

You should always generate a quote request immediately before scheduling an Order to ensure accurate rating.

Example Quote Call- Using 2 skids

Shipment Status and Tracking

There are two ways to track shipment status. One is using the Online Tracking Link and the other is by making GET calls for the status of an order. Please find below, how to do both.

Online Tracking Link

Replace xxxxxxxx bolded below with "billNumber" you get a response packet. Tracking will only start showing once dispatched.

https://trace.csatransportation.com/trace/external_bill_viewer.msw?search_value=xxxxxxx&trace_type=~PTLORDER

UNDERSTANDING TRACKING TERMS

Estimated Pickup- The date and times you entered when scheduling.

Estimated Delivery- The estimated deliver by date.

Status History- Will show the status and location when the shipment is picked up, docked at a terminal, and delivered. Notes will be provided to give more detailed information in AM or PM of when a shipment is picking up, delivering or due to arrive to a CSA Terminal. The date and location will be shown beside any status event.

Depart Shipper- Shipment has been picked up. This may also show as '**PICKED**' when dispatched to a beyond or advance partner.

Docked at CSA Terminal- Shipment has arrived at a CSA Terminal and the location will show with one.

Driver is Dispatched- Will show notes to indicate the planned date and AM or PM for the next status event to occur.

Arrive Consignee- Driver has arrived at the delivery location.

Depart Consignee- Shipment is delivered. This may also show as '**DELIVERED**' when dispatched to a beyond or advance partner.

EXAMPLE OF TRACKING LINK

GET call for Shipment Status

Once you have the proper 'Order ID' in your order (type T) response, you can perform GET calls to provide the Status History of the shipment.

GET Call

{{baseUrl}}/orders/**ORDER ID**/statusHistory

Response Values:

CONFQUEUE- Shipment confirmation queued for sending
CONFSENT-Shipment confirmation sent to caller
AVAIL- Shipment is available for dispatch
ASSIGN-Shipment is assigned to driver
DISP- Shipment has been dispatched to driver
DOCKED- Shipment is docked at a CSA terminal
DOCK NOTE-Communication on delay at dock
ALERT – Communication on delay intransit
ATTEMPT- Pickup was attempted but driver turned away
PICKED- Shipment has been pickup up
HOLD- Shipment is on hold
DELVD-Shipment has been delivered
COMPLETE-Accompanies DELVD
BILLD-Shipment has been billed

ARRSHIP- Arrive Shipper
DEPSHIP- Shipment is Picked up
ARRCONS- Shipment arrived at Consignee
DEPCONS- Shipment has been delivered
CUSSENT-Customs Documents have been sent to Customs Broker

GET calls for POD and Invoice

The Proof of Delivery (POD) and Invoice can be acquired through API, once they have been scanned to the order, using the following GET call. Typically, within two days of delivery for non beyond points and with five days of delivery for beyond points.

GET Call for POD

<https://tmap-test.csatransportation.com/tm/documents/POD/searchValues/billNumber/pdf>

GET Call for Invoice

<https://tmap-test.csatransportation.com/tm/documents/CSA Invoice/searchValues/billNumber/pdf>

Example Order ID for testing POD/Invoice Extraction

This Order Id can be used to test status calls and POD Invoice Extraction

Order ID: 5612903

billNumber: C1306005

Example Order ID for testing Status Extraction

Order ID: 7662896

Order ID: 7662207
